MediTec Slovakia Training

At 21st – 24th of November 2018, the first training course in the Erasmus+ Project Meditec were held in Kosice Slovakia. With wide participation from different universities in the consortium.

Basrah Medical College Meeting

A management meeting held in College of Medicine, University of Basrah negotiate the new technology that will be added in the field of anatomy by Erasmus + Project

Training in Košice

by

November 21st was the beginning of first training course that was held in Kosice Slovakia in **University of PAVOL JOZEF ŠAFÁRIK UNIVERSITY IN KOŠICE**, Faculty of Medicine. It was a four days training program in which the participants get benefit from the different fields present to them which include:

- Cardiovascular Presentation
- Approach to teaching anatomy
- Nursing Care
- Intensive care and First Aid
- Innovative techniques in Surgery
- Simulation in Gynecology
- Medical Physiology and Biophysics
- Experimental Medicine
- Biomedical Engineering

In Each of these themes, the participants have an idea about what new in that field and how PJSU have its own way to improve medical education in that field.

A Visiting to different laboratories in the faculty was helpful in providing the visiting staff with complete ideas about how teaching can be delivered through different discipline which enable a successful graduate outcome

New innovative laboratories in the field of Bioengineering, Experimental Medicine and simulation represent an advance to the visiting consortium.

Co-funded by the Erasmus+ Programme of the European Union

Improving Education in Anatomy, Steps By Basrah Medical College Iraq

Through a Series of meetings, Basrah medical College, represented by Assistant Professor Dr. Nazar Haddad, held a meeting with head of department of anatomy and teaching staff discussing the new opportunities that Erasmus+ Project MediTec will provide to improve teaching of anatomy, which is the corner stone In

syllabus in Medical School curriculum. Dr. Haddad present the Augmented virtual reality, the new addition that Meditec project will add to teaching of anatomy and how student can benefit from such an opportunities In addition a new addition as innovation was the Complete Anatomy Software that Basrah Medical College Try to add a additional tool to the way of teaching anatomy which

enable the teaching staff to share different components of demonstration and educational resources with student to get the highest benefit required.
